

#20 - OCTOBER 2023

Visit to the city of Montpellier to analyze its experiences in managing food waste reduction solutions and generate knowledge for the ToNoWaste project.

FUNDACIÓN DE LA COMUNITAT VALENCIANA PARA LA PROMOCIÓN ESTRATÉGICA EL DESARROLLO Y LA INNOVACIÓN URBANA (LAV)

The **ToNoWaste** València pilot team travelled to the city of Montpellier to learn about its experiences in food waste. The company, Cuinatur, organized the visit with CIRAD - Centre de coopération internationale en recherche agronomique pour le développement-. The Universitat Jaume I, Las Naves, CEMAS and Justicia Alimentaria also participated.

They visited CIRAD's Agri-Food Technology Platform where they experiment with different processes that improve food quality.

The team met with the Secretary General of the UNESCO Chair "Alimentations du Monde", Damien Conaré, and with Nicolas Bricas, expert in sustainable food systems and member of the IPES-Food panel, to learn about their actions and research on food waste.

The last visit was to the Montpellier Central Kitchen that supplies the schools of the municipality where they presented the food program, the food waste measures they carry out in schools and the governance structures such as the School Food Monitoring Committee.

All in all, it was a very inspiring exchange of experiences for the **ToNoWaste** team of the Valencia pilot project.
